	<p>Tides</p> 

# Earth's Cycles

- Takes 28 days (about 1 month)
- Caused from Moon revolving around Earth & Sun's light reflected off surface of Moon.

- Caused by rotation of Earth on its axis.
- 24 hrs.

- Caused from the revolution of Earth around the Sun & tilt on its axis.

- Moon's gravitational pull causes tides on Earth.
- 2 high, 2 low per day.
